## WORK EXPERIENCE

### Backend Developer

Freelance Job (Remote)

Jul. 2024 - Present  
Calgary, AB

- Responsible for managing and processing over 250,000 user data entries, ensuring efficient and secure data handling for our clients.
- Working within monorepo setup that incorporates microservices for modularity and maintainable code.
- Using Node.js and Express.js to build and maintain scalable server-side applications.

### Web Developer

Ingraph Ltd.

Jan. 2024 – May 2024  
Calgary, AB

- Developed a printing e-commerce website from scratch using the modern framework Next.js, integrating features such as add-to-cart functionality, user authentication with NextAuth.js, registration, and payment processing with Stripe and many more.
- For the Front-End I used React.js library, Tailwind CSS, TypeScript, and Shadcn. Made the website visually appealing while ensuring a seamless user experience across different devices and screen sizes.
- Utilized Axios for data requests on the back-end, and implemented Prisma ORM with a MySQL database to efficiently and securely manage and store user data, and utilized TypeScript for type safety.
