WORK EXPERIENCE

Web Developer   2024 Jan – 2024 May
Ingraph Ltd.   Calgary, AB

- Developed a printing e-commerce website from scratch using the modern framework Next.js, integrating features such as add-to-cart functionality, user authentication with NextAuth.js, registration, and payment processing with Stripe and many more.
- For the Front-End I used React.js library, Tailwind CSS, TypeScript, and Shadcn. Made the website visually appealing while ensuring a seamless user experience across different devices and screen sizes.
- Utilized Axios for data requests on the back-end, and implemented Prisma ORM with a MySQL database to efficiently and securely manage and store user data, and utilized TypeScript for type safety.

SKILLS

Front-End stack: JavaScript, TypeScript, HTML, CSS, Framer-motion, Bootstrap.

Back-End stack: Java, C#, .NET, ASP.NET, Object-Oriented Programming paradigm, GraphQL, Node.js, Express.js, Axios, Python, Prisma, RESTful API, jQuery, Ajax.

Libraries & Frameworks: Next.js, React.js, Redux, NextAuth.js, Stripe, Tailwind CSS, SASS, Vite.js, Resend, AWS.

Database: MySQL, MongoDB, Microsoft SQL Server, PostgreSQL.

Tools & Platforms: Git, GitHub, Postman, Figma, Vercel, Shadcn, Chakra-UI, Hostinger.

EDUCATION

Southern Alberta Institute of Technologies   2022 Oct – 2023 May
Object-Oriented in Software Development – Certificate

Cavite State University   2013 Jun – 2017 May
Bachelor of Science in Computer Science
